TOLO STAMFORD OTIENO

NETWORK ENGINEER AND SYSTEM ADMINISTRATOR

OBJECTIVE

A highly skilled Network Engineer and Web Developer with a strong background in fibre optics, network troubleshooting, and router configuration, seeking a challenging role where I can leverage my expertise in networking, programming, and Linux administration to enhance system efficiency and customer satisfaction to drive operational excellence.

PROFILE

Results-driven Network Engineer and Web Developer with 4+ years of experience in fibre optic systems, router configurations (MikroTik & Cisco), and network troubleshooting. Certified in HTML & Python, with hands-on experience in Linux administration and AI prompt engineering. Proven team leader with a track record of expanding clientele and boosting sales through efficient technical solutions. Currently enhancing expertise in Software Engineering (via Power Learn Projects) and Cybersecurity (via HackTheBox) to stay ahead in the evolving tech industry.

WORK EXPERIENCE

- Wish Cable Television** OCTOBER 2019 - PRESENT
Network Engineer & Team Leader
 - Configured and maintained MikroTik & Cisco routers, ensuring optimal network performance.
 - Conducted fibre cable splicing and resolved network outages promptly.
 - Led a team in CCTV installations and structured cabling for enterprise clients.
 - Increased company sales by expanding clientele through strategic networking solutions.
 - Provided technical support to customers, improving service delivery and satisfaction.
- New Image College, Mombasa** February 2019 - September 2019
IT Support Technician
 - Managed campus network infrastructure, including router configurations and troubleshooting.
 - Assisted in setting up LAN/WAN connections and maintaining IT equipment.
 - Provided technical assistance to staff and students, resolving connectivity issues.
